PROFESSIONAL SUMMARY

Frontend Engineering Professional specializing in React and Next.js, with a strong focus on scalable component architecture, API integrations, and high-performance web applications. Currently driving AI-powered feature development for an enterprise HR portal at Samsung R&D Institute, including an intelligent chatbot and KPI insights dashboard.

EXPERIENCE

Frontend Engineer (Consultant) Mar 2025 – Present

Adecco India • Client: Samsung R&D Institute Delhi

- Leading feature development for Sampark Vconnect 2.0, a React and Material UI-powered enterprise employee portal serving 8,000+ users across 2 Samsung R&D centers pan-India, including 3,000+ users at the Delhi institute.
- Developed an AI-powered KPI insights dashboard for People Partners, surfacing workforce analytics and performance trends to support data-driven HR decision-making.
- Built an AI chatbot integrated with a streaming API for real-time response delivery, assisting employees with HR policy queries and reducing dependency on manual HR support.
- Integrated a live event streaming API into the portal, enabling real-time event updates and announcements across all branch deployments.
- Built a comprehensive Excel reporting module covering 7+ report types — including attendance (regular, contractual, intern), employee details, annual health, in/out summary, and vendor-specific reports — enabling data-driven workforce management across centers.
- Improved portal performance by 40–50% across key components through targeted refactoring, lazy loading, re-render optimization, and removal of unused dependencies from the production bundle.
- Architected scalable state management using Context API, reducing prop-drilling complexity and improving maintainability across the portal's growing feature surface.
- Mentored 2 interns and onboarded 2 fresher engineers on React best practices, component design patterns, and code review standards, accelerating their ramp-up on a production codebase.

React.js Developer May 2024 – Jan 2025

RightO Services Pvt. Ltd. • Client: EMB Global

- Architected and delivered core CRM modules — dashboards, reporting, and client management — using Next.js with SSR, improving application performance for an in-house platform at EMB Global.
- Built data-rich reporting dashboards using Recharts, featuring real-time data visualization across key business metrics.
- Implemented advanced client management interfaces with dynamic search, filtering, and pagination to handle large-scale CRM data efficiently.
- Developed client-side automated cost estimation logic, enabling real-time cost calculations directly in the UI without API dependency.
- Optimized API integration patterns and implemented efficient caching strategies, reducing data fetch times by 35%.
- Collaborated with a cross-functional team of 5 developers, 2 testers, and 1 project manager to deliver critical features on schedule.

Software Engineer May 2022 – May 2024

Capgemini Technology Services Limited

- Enhanced investment banking dashboards for HSBC corporate clients, improving UI, refining data visualizations and charts, and implementing advanced filters for finance and cash management workflows.
- Developed 4 automated test scripts for Morgan Stanley using Python and Selenium, improving testing efficiency and reducing manual QA effort.
- Collaborated with cross-functional teams across the APAC region to integrate RESTful APIs and microservices.

React Developer Jan 2022 – May 2022

Shivila Technologies Pvt. Ltd.

- Developed a responsive HR admin dashboard using React and Material-UI, enabling streamlined management of employee data and HR workflows.
- Implemented MUI Data Grids with advanced sorting and filtering capabilities for efficient handling of large HR datasets.
- Built data visualization components for business analytics, providing actionable insights through interactive charts and reports.
- Managed application state using Redux, ensuring predictable data flow across the dashboard's complex HR workflows.
- Assigned and led an 8-member frontend team, successfully delivering and deploying projects ahead of deadlines.

SKILLS

Frontend: React.js, Next.js, JavaScript, HTML5, CSS3, Redux, Zustand

UI/Styling: Tailwind CSS, Shadcn/UI, Material-UI, Bootstrap, Styled-Components, SCSS

Tools & Infrastructure: Git, GitHub, Vercel, Netlify, Firebase, Webpack, Postman

Project Management: Jira, Clickup

CMS: PayloadCMS, Hygraph, Contentful, Sanity

AI-Assisted Development: Cline

Familiar With: TypeScript, AWS

EDUCATION & CERTIFICATIONS

Bachelor of Technology in Computer Engineering | Mizoram University | 2015 – 2019

Understanding Financial Markets – Coursera | 2022

Agile Software Development – Coursera | 2022
